Achal Utkarsh

Front End Developer

Focused IT professional with almost 2 years experience in front end development. Worked under high deadlines. Excellent track-record of creating and maintaining software solutions for existing clients. Mainly proficient in Angular.

Work History

2019-07 - Current

Front End Developer

Nissan Digital India, Trivandrum, Kerala

- Developed Sales Mobile iOS App using Angular, Cordova & D3.js which helps to view global finances and performance metrics in the form of various bar & area charts for all Nissan vehicle segments with features to filter a/c to day, month, year, market & model.
- Collaborated with UX/UI Team to provide the best design system for consistency and reusability.
- Single handedly built a responsive angular Library - Feedback Mechanism, imported over many applications around Nissan, hosted over their private repo, primarily to receive feedback & queries from the users.
- Worked in a team of 2, for developing small-events module which allows to create a new type of vehicle in the market or edit the existing one with a new model.
- Worked in a web application tool for planning product development of Nissan vehicles - timeline for modification of data, charts representing sales & volume across different markets and specific models with features to have different combination of model families.
